01.553.000	with single-sided 1 high cycle space right, with anchor part
01.553.025	with single-sided 1 high cycle space right, with baseplate Ø 220 mm
01.553.700	additional charge for powder-coated in RAL
01.554.000	single-sided high/low, with anchor part
01.554.025	single-sided high/low, with baseplate Ø 220 mm
01.554.700	additional charge for powder-coated in RAL

TRIANGLE CYCLE PARKING SYSTEM

The Triangle parking system is part of one of our co-ordinated street furniture ranges. Drawing on a recognisable theme, the Triangle range is a harmonious range of street furniture products covering; seating, bollards, litter bins, shelters and lighting, enabling designers to create an integrated external environment.

There are three versions of the Triangle cycle stand; Triangle-10, Triangle-20 and Triangle-30. Each stand has wheel brackets integrated into the design with three general options;

- a) a single wheel low bracket on the left only
- b) a single wheel high bracket on the right only
- c) a single wheel low bracket on the left and a high bracket on the right

Again, the FalcoTriangle stand offer a real design led cycle parking option to encourage people to cycle.

1 TRIANGLE-10

The Triangle-10 is an eye-catcher in 2 ways. It is a model which is very easy on the eye, whilst a bicycle can be secured to the eye at the top. The triangle motif is featured in the wheel bracket. The model bends towards the user, so that the bicycle can be easily chained to the eye. The wheel brackets and the ring on the Triangle-10 are made of solid steel. The double eyes mean that any bicycle can be secured in accordance with the 1.5 minute standard stipulated by FietsParKeur (a Dutch standard). So there is no need to secure 2 bicycles to 1 eye! Also available in a double-sided design with 4 spaces.

The main tube on the Triangle-10 model has a diameter of 48.3x3.25 mm. The crossbar onto which the wheel bracket is welded has a diameter of 41.5x2 mm. The wheel bracket is also solid, and has a 13 mm diameter and a 55 mm gap. The optional base plate is 220x6 mm in diameter and has 3 circular fixing holes Ø12mm.

Triangle-10, Part code 01.554.000
