34.518.011	bench without back, black supports

TRIANGLE STREET FURNITURE

The Triangle range of products from Falco is a co-ordinated range of street furniture characterised by its fresh eye catching design, its functionality and its durability. The range consists of; shelters, canopies, benches and seating, litter bins, bollards and cycle parking systems.

The range also benefits from the versatility of the material options available: a range of aggregates can be used to create either light cream supports or heavier appearance darker mounts to contrast with the hardwood slats. Similarly, the range can be made in either stainless steel or powder coated in any of the 192 RAL colours.

As a result, the aesthetics of the FalcoTriangle range are well suited to both modern urban locations or traditional rural settings, providing the architect with a very versatile range of products with which to create a distinctive outdoor environment.

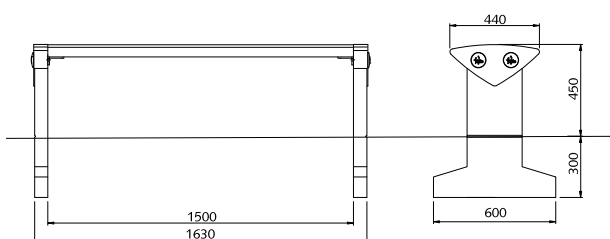

TRIANGLE SEATING

The Triangle bench is a combination of strong and solid aggregate uprights, maintenance free FSC hardwood slats and galvanised steel support brackets.

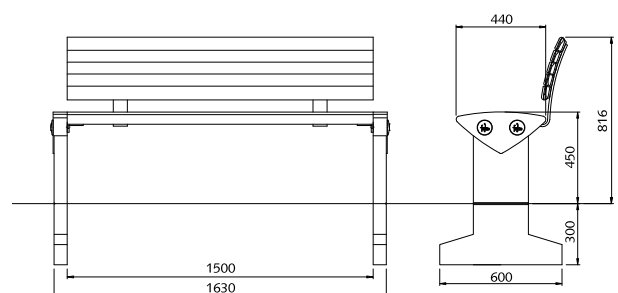

The upright mounts can be manufactured in either a black polished finish or in matt concrete. The seat and optional backrest are manufactured from FSC hardwood. The remaining support and fixing brackets are manufactured from hot dip galvanised steel which can be additionally powder coated to complement the design scheme.

The side uprights are supplied as standard with an extra 300mm to aid below ground fixing. For surface fixing, this can be removed, and we must be notified at time of ordering.

Triangle bench,
Part code 34.517.017 / 34.518.017

Triangle seat,
Part code 34.515.017 / 34.516.017

TRIANGLE STAINLESS STEEL

The Triangle seat is an attractive bench and can be enhanced using stainless steel. A combination of strong solid bonded aggregate/ concrete, maintenance free stainless steel and galvanised steel support brackets. The seat and backrest **have attractive pierced slits to enhance the bench's appearance and are gently curved for comfort.**

The other parts of the supporting structure are manufactured from galvanised steel which can be powder coated in any of the 192 RAL colours to complement the design scheme.

The seats are mounted between the concrete elements using special Falco caps. This is the final touch for a very attractive product. The concrete supports include an 300x600 mm element for in-ground installation.

There are optional side supports in natural stone, in black granite.
